6

Years:

4

Places available:

80

Classes:

Face to face

Language teaching:

Spanish, Valencian

First enrolment credit fee:

12.79€

First enrolment credit fee
for non-EU and non-communicating students from abroad

25.58€

:

Degree Academic Committee President (CAT):

Jordi Giner Monfort

Degree Coordinator:

Alejandro Pizzi

Work Placement/Internship Coordinator:

Raúl Lorente Campos

International Coordinator:

Carmen Corona Sobrino

Academic, scientific or professional interest:

The Degree in Sociology provides students with the theoretical knowledge and practical tools necessary to analyse the characteristics of present-day societies in an objective and critical manner. In addition, this analytical skill will help them to develop social action strategies that improve the living conditions of the people in these societies (public policies, company dynamics, educational projects, analysis and statistics centres, etc).

Worth Noting:

One characteristic of this qualification is that it requires a multidisciplinary knowledge that covers different areas: economics, history, psychology, sociology, statistics, etc.

Remember that this degree has subjects that are related to statistical, descriptive and inferential analysis.

Students should have an empathetic inclination to understand the object of study.
